BRONZE & STEEL WATER GAGE VALVES

BRONZE VALVES IN 5 MODELS • STEEL VALVES IN 18 MODELS

BRONZE WATER GAGE VALVES FEATURE HIGH PERFORMANCE MATERIALS FOR HEAVY-DUTY SERVICE

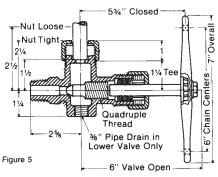

These Clark-Reliance valves are designed and manufactured for demanding applications. Designated as high-grade valves, all models feature valve bodies and packing nuts of ASME Code Bronze. Additional design features include an 18-position gage lever (Figure 23), integral seats and choice of screwed or flanged connections. Valve control is speeded by quadruple stem threads that allow full open/closed with only one-quarter turn. Refer to the Model Selection Guide for individual model information.

Specification Data Chains and handles that indicate open/closed positions are provided, as required by the ASME Boiler Code. Lower valves employ a %" pipe tap for blowdown. A complete valve set includes upper and lower valve, pyrex tubular glass and guard rods (if mounting centers are specified) and two 5-foot chain lengths. Valve model numbers are stamped on the top of upper valve. NOTE: Clark-Reliance does not recommend tubular glass for use above 250 WSP.

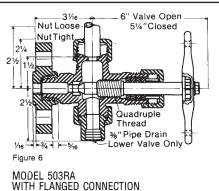

TABLE I: BRONZE WATER GAGE VALVES • MODEL SELECTION GUIDE

MODEL	CONNECTION	MAXIMUM PRESSURE	NET WT. PER SET	FIG.
402RS	½" NPT	250 PSI	8 Lbs.	1
403RS	3⁄4" NPT	250 PSI	8 Lbs.	1
404RS	3⁄4" NPT	450 PSI	8 Lbs.	2
502RA	3/4" 300 Lb. RF Flange	250 PSI	13 Lbs.	3
503RA	3/4" 300 Lb. RF Flange	450 PSI	13 Lbs.	4

MODEL 402RS & 403RS WITH SCREWED CONNECTION

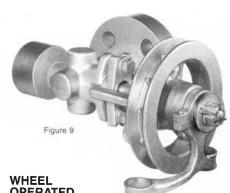

LEVER OPERATED BRONZE VALVES FOR PRESSURES TO 450 PSI

LEVER OPERATED SERIES 800 FORGED STEEL VALVES FOR PRESSURES TO 1500 PSI

OPERATED 600 & 700 SERIES FORGED STEEL VALVES FOR PRESSURES TO 3000 PSI

SERIES 800 LEVER OPERATED FORGED STEEL WATER GAGE VALVES IN 11 MODELS

For Dependable Steam Service To 1500 PSI At 600°F

Available With 3/4" Male Pipe Connection Or Standard ANSI Flange

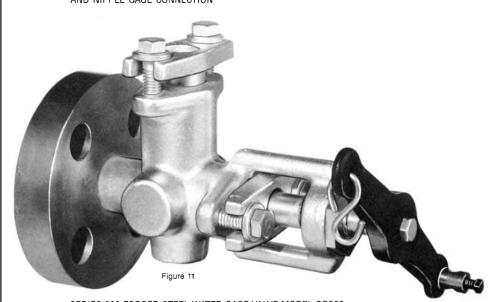

Eleven models of Series 800 valves offer choices in vessel and gage connections, ball check locations, and union availability. Refer to the Model Selection Guide for individual model features to meet your specific installation requirements.

All Series 800 valves are of outside screw and yolk design. Design and performance features include:

- Forged steel body to ASTM A105 Specification.
- Type 303 stainless steel stem and one-piece 420F stainless steel replaceable seat (Figure 25).
- Grafoil* Packing Cartridge (Figure 24) is secured by identical two-bolt packing yokes.
- Quadruple stem thread allows full open/closed positions with only one-quarter lever turn.
- Stem bushing is positioned outside body, away from high temperatures and corrosive fluids.
- Lower valves provide ³/₈" tap and female socket weld connection for blowdown.

Complete valve sets include two 5-foot lengths of lever chain, with handles that indicate open/closed valve positions as required by the ASME Boiler Code.

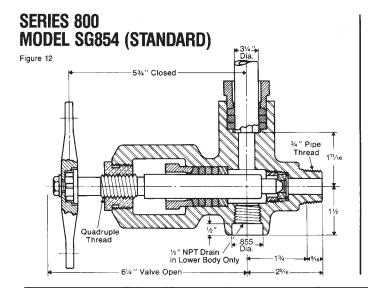

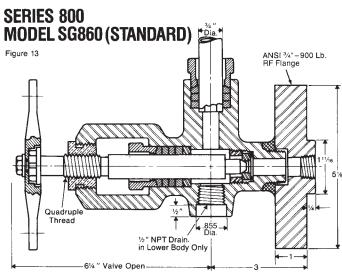

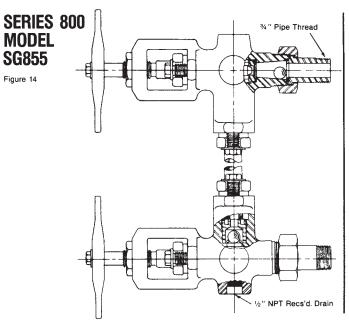

SERIES 800 FORGED STEEL WATER GAGE VALVE MODEL SG860 WITH $34^{\prime\prime}-900$ Lb. RF FLANGE VESSEL CONNECTION AND NIPPLE GAGE CONNECTION

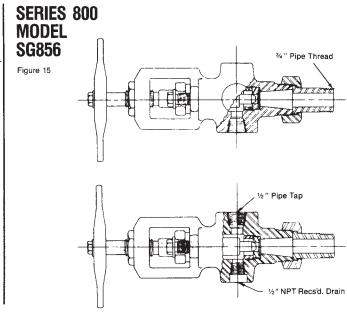

TABLE II: SERIES 800 FORGED STEEL WATER GAGE VALVE • MODEL SELECTION GUIDE To Specify Live-Loading Feature (Figure 30), Add P To Model Number

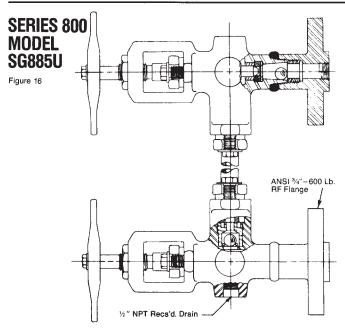

Model	Fig. No.	Vessel Connection		Ball Check	Ball Check		Gage	Max.	Net Wt.
		Flange	Male Thread	Lower	Upper	Union	Connection	Pressure	Per Set
SG854	10-12	•	3/4"	No	No	No	3/4" OD Nipple	1500 PSI	15 Lbs.
SG855	14	•	3/4"	Yes	Yes	Yes	3/4" OD Nipple	1500 PSI	16 Lbs.

SERIES 600 & SERIES 700 WHEEL OPERATED FORGED STEEL WATER GAGE VALVES IN 7 MODELS

For Dependable Steam Service To 3000 PSI At 700°F

Exclusively Chain Wheel Operated Models

Seven models of Series 600 and Series 700 valves offer choices in vessel and gage connections, equalizer tube availability and maximum steam pressure services. Refer to the Model Selection Guide for individual model features to meet your specific installation requirements.

All chain wheel operated models are of outside screw and yoke design. Design and performance features include:

- Forged steel body to ASTM A105 Specification.
- Type 303 stainless steel stem.
- On Series 700 models only, one-piece 420F stainless steel replaceable seat (Figure 25).
- Grafoil* Packing Cartridge (Figure 24) is secured by identical two-bolt packing yokes.
- Single-pitch stem thread allows easy valve operation by chain wheel.
- Stem bushing is positioned outside body, away from high temperatures and corrosive fluids.
- Lower valves provide ³/₈" pipe connection and female socket weld connection for blowdown.

NOTE: Female socket weld connectors are not included when valves are to be welded to water columns. To specify for the above applications add "C" to model numbers. Example: Model SG777 (with socket weld connectors) becomes Model SG777C (without socket weld connectors).

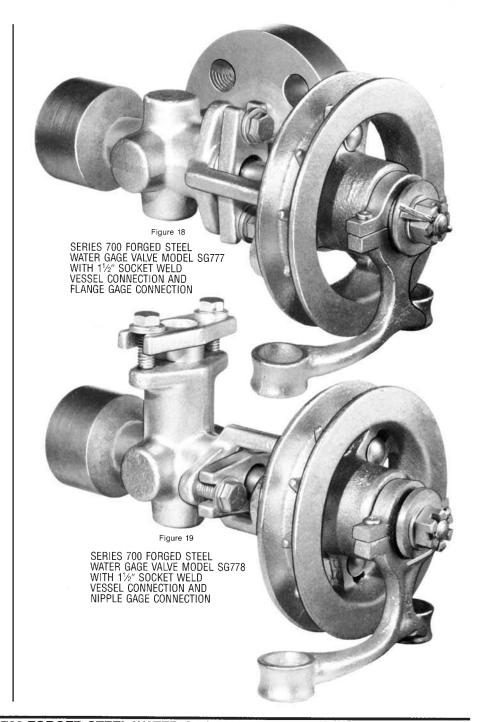

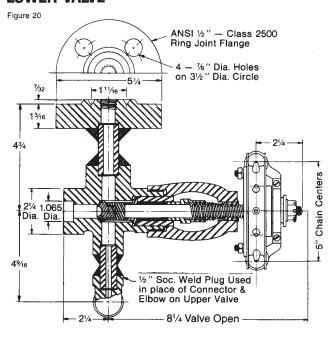

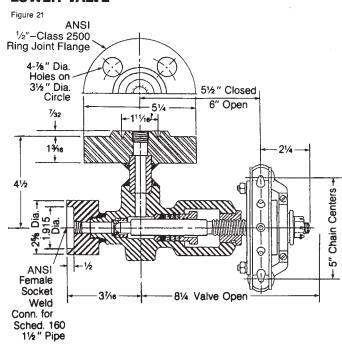

TABLE III: SERIES 600 & SERIES 700 FORGED STEEL WATER GAGE VALVES • MODEL SELECTION GUIDE
To Specify Live-Loading Feature (Figure 30), Add P To Model Number

Model	Figure No.	Vessel Connection	Gage Connection	Live-Loading Option	Equalizer Tube	Max. Pressure	Net Wt. Per Set
SG660	•	³⁄4" – 2500 Lb. RF Flange	½" – 2500 Lb. RJ Flange	No	_	3000 PSI	30 Lbs.
SG677	20	³¼" Female Socket Weld	½" – 2500 Lb. RJ Flange	Yes No		3000 PSI	27 Lbs.
SG677E	•	³¼" Female Socket Weld	½" – 2500 Lb. RJ Flange	Yes Yes		3000 PSI	27 Lbs.
SG760	_	³⁄4" – 900 Lb. Lg. Male Flange	3¼" OD Nipple	Yes No		1500 PSI	23 Lbs.
SG777	18-21	1½" Female Socket Weld	½" – 2500 Lb. RJ Flange	Yes No		2500 PSI	27 Lbs.
SG777E		1½" Female Socket Weld	½" – 2500 Lb. RJ Flange	Yes Yes		2500 PSI	27 Lbs.
SG778	19-22	1½" Female Socket Weld	3⁄4" OD Nipple	Yes No		1500 PSI	18 Lbs.

SERIES 700 MODEL SG777 LOWER VALVE

SERIES 700 MODEL SG778 LOWER VALVE

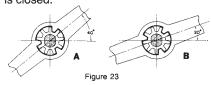

Figure 22

18-POSITION GAGE LEVER

Positive, non-slip locking in 18 positions is assured with the patented Clark-Reliance gage lever. The lever is standard on all Series 400 and 500 bronze water gage valves and all Series 800 forged steel water gage valves.

The gage lever is readily adjusted to the desired angle regardless of the valve stem orientation when the valve is closed.

MOVING THE LEVER FROM POSITION A TO B ACHIEVES AN INTERMEDIATE ANGLE ADJUSTMENT QUICKLY AND EASILY.

GRAFOIL® PACKING CARTRIDGE

Figure 24 GRAFOIL* WASHERS INSIDE CARTRIDGE

Clark-Reliance forged steel water gage valves feature an advanced packing cartridge that provides longer leakfree operation. The cartridge replaces loose, individual pack-

ing washers and is now standard on all Series 600, 700 and 800 models. The cartridge is also provided in the RK-34 Live-Loading Retrofit Kit (Figure 30).

ONE-PIECE VALVE SEAT

Figure 25 REPLACEABLE SEAT WITH HEX-HEAD Faster renewing, improved performance and longer service life are all benefits of the one-piece valve seat standard in Series 700 and Series 800 valves. Machined from 420F

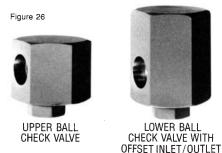

stainless steel, the hardened valve seat offers precise fit and flow surfaces.

AUTOMATIC BALL CHECK VALVES PROTECT AGAINST BLOWOUT DAMAGE

Where specifications require use of automatic ball check valves ahead of a water level gage, Model SG77BC Upper & Lower Check Valves can be factory installed. Note the 1.125-inch offset in elevation between inlet and outlet ports of the Lower Ball Check Valve (Figure 27).

These independent check valves comply with Par. A-18 of Section I of the ASME Boiler Code. The automatic valves will severely restrict the flow of steam and water to the level gage in the event of glass breakage or gasket blowout.

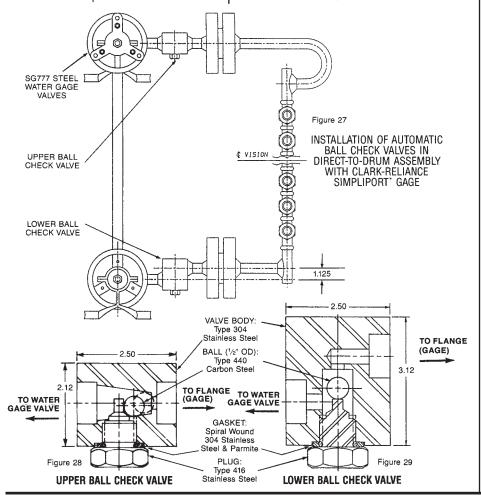

Caution While the advantage of using these check valves ahead of a level gage is evident, as presented above, the principal disadvantage is that the check valves will prevent effective blow-

down of the level gage itself. When the level gage drain valve is opened, pressure inside the level gage drops, and the check valve balls are driven up into closed positions by system pressure.

Order Clark-Reliance Automatic Ball Check Valves by using the following numbers:

Upper Ball Check Valve: SG77BCU Lower Ball Check Valve: SG77BCL Ball Check Valve Set: SG77BC

For additional information,

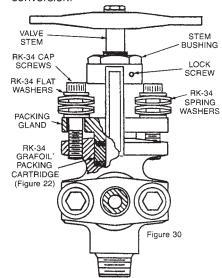

LIVE-LOADING RETROFIT KIT FOR SG SERIES FORGED STEEL WATER GAGE VALVES

Fits All Series 700 And Series 800 Models

Available As Specified Option On New Valves*

The Clark-Reliance RK-34 Live-Loading Kit is available to improve the performance and service life of Series 700 and 800 valves already installed. Live-loading produces a more leak-free valve, resisting damage from vibration, pressure changes, time in service and other wear factors.

The kit includes all required parts and comes complete with step-by-step instructions for easy and rapid conversion.

RK-34 RETROFIT PARTS COMBINE WITH EXISTING PARTS TO ACHIEVE LIVE-LOADING PERFORMANCE. RETROFIT KIT INCLUDES:

- 2 CAP SCREWS
- 4 FLAT WASHERS
- 1 GRAFOIL PACKING CARTRIDGE
- 8 SPRING WASHERS
- INSTRUCTIONS

*To specify Live-Loading on new valves, add "P" to the model numbers. (Example: SG854P)
